I. Project types

4 types of projects can be submitted to Biomics:

- Biomics
- Biomics with outsourcing
- Autonomy
- Autonomy with outsourcing

Biomics: Libraries prepared by Biomics. Sequencing runs prepared by Biomics and sequenced at Biomics.

Biomics with outsourcing: Libraries prepared by Biomics. Sequencing outsourced with a Biomics partner.

Autonomy: Libraries prepared by the users. Sequencing runs prepared by users and sequenced at Biomics using the shared room. Data automatically sent by Biomics to the users.

Autonomy with outsourcing: Libraries prepared by the users. Sequencing outsourced with a Biomics partner. Data sent by Biomics.

II. Storage

Data is stored on the Biomics space of the Pasteur Institute server. Data retention policy depends on the type of project submitted :

Project type	BCL Raw data (years)	Fastq (years)
Biomics	2	5
Biomics with outsourcing	2	5
Autonomy	1	x
Autonomy with outsourcing	1	x
